Mathematical Biosciences

an international journal

Volume 114

NORBERTO JOSÉ BARTOLONI (Buenos Aires, Argentina)
Application of Markov Chains to Linked Genes with Interference. II. Genotypic Selection 1

VIGGO ANDREASEN (Roskilde, Denmark)
The Effect of Age-Dependent Host Mortality on the Dynamics of an Endemic Disease 29

N. LIMIĆ (Croatia, Yugoslavia)
Relationship Between Compartmental Masses and Transition Rates in Stochastic Compartmental Models 59

ALAN S. PERELSON (Los Alamos, New Mexico), DENISE E. KIRSCHNER (Nashville, Tennessee), AND ROB DE BOER (Los Alamos, New Mexico)
Dynamics of HIV Infection in $CD4^+$ T cells 81

KRZYSZTOF KOWALSKI (Lodz, Poland)
Fluctuations in the Mass-Action Model for Ligand–Receptor Binding 127

WILLIAM E. KING AND DANIEL B. RUDOLPH (Lewisburg, Pennsylvania)
Temperature Rise in Tumor Tissue During High-Dose-Rate Photoradiation 135

BRUNO VIELLE (Angers, France) AND GILBERT CHAUVET (Angers, France and Pittsburgh, Pennsylvania)
Mathematical Study of Periodic Breathing as an Instability of the Respiratory System 149

BOYD A. WAITE AND JOEL D. STEWART (Annapolis, Maryland)
An Idealized Dynamical Model of Simple Diffusional Interactions Between Macromolecules and Between Macromolecules and Surfaces 173

GÁBOR HORVÁTH, ÁRPÁD SZAKÁL, AND PÉTER ÉRDI (Budapest, Hungary)
Mathematical Description and Computer Simulation of Retinal Cometlike Afterimages: A Modified Neural Equation with Stability Analysis 215

BOOK REVIEW

JON BRODZIAK (Woods Hole, Massachusetts)
Modelling Biological Populations in Space and Time (Eric Renshaw) 249
